

You still have ample time this season to visit Rainier National Park—America's wonder playground—reached direct by the trains of the Chicago, Milwaukee & St. Paul

The Modern Road to the Ancient East

Gates to the Orient! Such are Seattle and Tacoma, new ports for the immemorial East. They are on the short steaming route to China and Japan. Down to their very wharves, where the fast palatial ships of your own country arrive and depart, runs that incomparable transcontinental train, "The Olympian." In the service and equipment of this premier train of the Chicago, Milwaukee & St. Paul, the traveler to and from the Orient finds the very last word in modern railway transportation. In its on-time, smooth, *electrically* driven flight across the shining mountains, he enjoys the crowning achievement of the most progressive railroad in the world.

Booklet on the Orient and full information regarding low round-trip fares to the Pacific Northwest sent on request.

GEORGE B. HAYNES, General Passenger Agent, 1248 Railway Exchange Building, Chicago

The only line operating transcontinental trains by electric power

The only line operating over its own rails all the way between Chicago and Puget Sound

The only line owning and operating its own sleeping cars between Chicago and Seattle-Tacoma

The shortest line from Chicago to Seattle-Tacoma and the Orient

253-264
